EDUCATION

University of Miami

B.S: Data Science & AI, Computer Science, Mathematics

Coral Gables, Florida

Expected: May 2026

- **Honors:** Stamps Scholar at University of Miami (Highest Honor Scholarship at University of Miami), Foote Fellow Honors

SKILLS

Programming Languages: Python, HTML, CSS, Java, JavaScript, C++, C#, C, Swift, SQL, PHP, Excel VBA

Frameworks: NextJs, ReactJs, TensorFlow, Pytorch, NodeJS, TailwindCSS, Laravel, MySQL, Mongoose, Express, Xcode, React Native, JUnit, Agile, Scrum

Services / Databases: Clerk, MongoDB, Supabase, Firebase, MariaDB, Swagger, Docker

Certifications: MTA Programming Java, MTA Programming JavaScript, MTA Programming HTML/CSS, MTA Programming Python

WORK EXPERIENCE

University of Miami Orthopedics Research Labratory

Student Machine Learning Engineer and Researcher

Coral Gables, Florida

March 2025 – Till Date

- Developed and trained a CNN on EMG signals to aid muscle rehabilitation. Focused on signal preprocessing and data augmentation to improve model performance.

Insigneo Financial Group

Machine Learning Engineer and Quantitative Analyst

Coral Gables Florida

October 2024 – December 2024

- Worked with data preprocessing and training AI model for portfolio optimization

Headstarter

Software Engineering Fellow

Remote

July 2024 – October 2024

- Developed Projects ranging from Professional Portfolios using Next.js Framework to AI Web-based Applications
- Used Open AI API and other AI endpoints with the support of customization using Pytorch and TensorFlow

DUCAB (Dubai Cable Company)

Quantitative Analyst and Data Science Intern

Dubai, United Arab Emirates

June 2024 – August 2024

- Designed and optimized a proprietary algorithmic trading bot to enhance portfolio performance.
- Automated hedge fund auditing by consolidating Excel reports with Python, improving accuracy and efficiency.
- Developed a Python-SAP pipeline to extract purchase order data from PDFs and automate data entry, reducing processing time by 80%.

University of Miami Cancer Research Laboratory

Student Researcher | R | Rstudio | Python |

Coral Gables, Florida

November 2023 – April 2024

- Conducted research on the correlation between HERV gene expression and various cancers, focusing on glioblastoma. Analyzed patient data across different brain regions and visualized differential gene expression using Volcano Plots.

AVAS Technology

Full Stack Software Engineering Intern | Laravel | PHP | JUnit | MariaDB |

Atlanta, Georgia

August 2023 – December 2023

- Developed and maintained a full-stack application using PHP, Laravel, and JUnit
- Seamlessly incorporated the use of effective unit testing while also adding new features
- Led the development of a web application aimed at optimizing classroom management, including the migration and creation of the backend using PHP

PROJECTS

Unsupervised Machine Learning Algorithmic Trading Bot

July 2024

| *Python | Jupyter Notebook |*

- More advanced trading model that downloads the S&P 500 Index fund and uses a K-means Clustering to find out what stocks to add to the portfolio that is predicted to grow.
- Uses Different Technical Indicators as features such as ATR (Average True Range), MACD (Moving Average Convergence Divergence), Bollinger Bands, RSI (Relative Strength Index).
- Also employed the use of Fama French Factors as well with the Garman Klass Volatility Formula as training features.

Basic Algorithmic Trading Bot

June 2024

| *Python | Jupyter Notebook |*

- Developed a Python-based stop-loss trading bot that simulated trades within a 1% margin. Used Jupyter Notebook for strategy backtesting and data visualization.

Full Stack Real Estate Website

June 2023

| *NextJS* | *HTML* | *CSS* | *Clerk* | *Supabase* |

- Developed and a Full Stack Next JS application that creates and manages housing properties.
- Application has full CRUD operations for facilitating user experience
- Seamless search engine that uses Google Maps API to visualize a map of location of properties
